WORK EXPERIENCE

I do not have any work experience in companies, however I have carried out collaborative projects with other developers, I also take the authority to create my own project to practice the topic of a version control system, folder structure and good refactoring in the code.

I am passionate about **creating and designing websites** with good accessibility and **SEO**. Using the available languages and tools in the best way.

It has been approximately three years since I started in this sector to learn and practice!

EDUCATION HISTORY
